No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                               1 MAPPTGVLSSLLLLVTIAGC......VSMNGSIRNGASFSYCSKDR 1072

; Sequence 6, Application US/09593870A
; Patent No. 6548643
; GENERAL INFORMATION:
; APPLICANT: McKenzie, lan F.C.
; APPLICANT: Pietersz, Geoff Allan
; TITLE OF INVENTION: Antigen Carbohydrate Compounds and Their
; TITLE OF INVENTION: Use in Immunotherapy
; FILE REFERENCE: 2368-McKenzie
; CURRENT APPLICANTION NUMBER: US/09/593,870A
; CURRENT FILING DATE: 1998-12-30
; NUMBER OF SEQ ID NOS: 69
; SOFTWARE: FastSEQ for Windows Version 3.0
; SEQ ID NO 6
; LENGTH: 23
; TYPE: PRT
; ORGANISM: Homo sapiens

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Toxicon 42:15-20(2003).

-i-FUNCTION: HwTx-V reversibly paralyzes locusts and cockroaches, and causes death with larger doses. It has no effect on mice by intra-abdominal, nor intracerebrowenticular injection. Its natural mutant mHwTx-V shows no effect on locusts, cockroachs, and mice.
-i-SUBCELLULAR LOCATION: Secreted.
-i-TISSUE SPECIFICITY: Expressed by the venom gland.
-i-MASS SPECIFICITY: MW-4111.4; MW_ERR=0.4; METHOD=MALDI; RANGE=1-
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      -!- MASS SPECTROMETRY: MW=3877.1; MW_ERR=0.4; METHOD=MALDI; RANGE=1-

"Three-dimensional structure in solution of neurotoxin III from the sea anemone Anemonia sulcata.";
slockhemistry 33:11051-11051(1994).
-!- FUNCTION: Binds specifically to the sodium channel.
-!- SUBCELLULAR LOCATION: Secreted; cnidocyst.
-!- SIMILARITY: Belongs to the sea anemone short toxin family.
PDB; A94446; TZAZ3.

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

                    metallothionein - cultivated mushroom
C;Species: Agaricus bisporus (cultivated mushroom)
C;Species: Agaricus bisporus (cultivated mushroom)
C;Date: 17-Mar-1987 #sequence_revision 17-Mar-1987 #text_change 09-Jul-2004
C;Accession: A03286
R;Munger, K.; Lerch, K.
Biochemistry 24, 675-1-6756, 1985
A;Title: Copper metallothionein from the fungus Agaricus bisporus: chemical and spectros
A;Reference number: A03286
A;Attle: Copper protein
A;Residues: 1-25 < AUM)
A;Ccoss-references: UNIPROT:P04358
A;Cross-references: UNIPROT:P04358
A;Cross-references: UNIPROT:P04358
C;Comment: In contrast to the vertebrate metallothioneins, the fungal proteins bind copp
C;Comment: The absorptive, luminescent, and stereoptical properties of the copper MT are
C;Superfamily: metallothionein
C;Keywords: chelation; metal binding; metal-thiolate cluster
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          ô

RESULT 13
US-09-949-016-9270
Sequence 9270, Application US/09949016
Patent No. 6812339
GENERAL INFORMATION:
APPLICANT: VENTER, J. Craig et al.

```
TITLE OF INVENTION: POLYMORPHISMS IN KNOWN GENES ASSOCIATED
TITLE OF INVENTION: WITH HUMAN DISEASE, METHODS OF DETECTION AND USES THEREOF
FILE REFERENCE: CL001307
CURRENT APPLICATION NUMBER: US/09/949,016
CURRENT FILING DATE: 2000-04-14
PRIOR PELLING DATE: 2000-10-20
PRIOR FILING DATE: 2000-10-03
PRIOR FILING DATE: 2000-10-03
PRIOR PILING DATE: 2000-09-08
NUMBER OF SEQ ID NOS: 207012

Patent No. 6551795
GENERAL INFORMATION:
THE OF INVENTION: WUCLEIC ACID AND AMINO ACID SEQUENCES RELATING TO PSEUDOMONAS
TITLE OF INVENTION: AERUGINOSA FOR DIAGNOSTICS AND THERAPEUTICS
TITLE OF INVENTION: AERUGINOSA FOR DIAGNOSTICS AND THERAPEUTICS
TITLE OF INVENTION: AERUGINOSA FOR DIAGNOSTICS AND THERAPEUTICS
TITLE OF INVENTION: AERUGINOSA FOR DIAGNOSTICS AND THERAPEUTICS
TITLE OF INVENTION: US 60/074,788
PRIOR PLING DATE: 1999-02-18
PRIOR PLING DATE: 1998-02-18
PRIOR PLING DATE: 1998-02-18
PRIOR FILING DATE: 1998-07-27
NUMBER OF SEQ ID NOS: 33142
SEQ ID NO 30227
LENGTH: 2736
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                1033 SGTAEPGATVTLTDGSGNPIGQVTADGSGNWSFTP----STPLADGTVVNA-TATDPA 1085

PIR Database

1: pir1:* 2: pir2:* 3: pir3:* 4: pir4:* 79:*

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

A46405
C protein alpha antigen - Streptococcus sp. (strain A909, group B, type Ic)
C;Species: Streptococcus sp.
C;Date: 21.Sep-1993 #sequence revision 20.Sep-1999 #text_change 03-Nov-2000
C;Accession: A46405, B46405; T30854
